

LysiNex

Granulated Lysine Monohydrochloride 98.5%

Lysine is an indispensable part of any feed formulation for pigs and poultry. It is amongst the top limiting amino acids for all monogastric species, including pigs, poultry, rabbits, pets and non-ruminating calves and other cloven-footed animals.

Now, it is being widely used by aquaculture feed industry, as it has a direct influence on the meat quality and characteristics.

Daily Lysine supplementation has a direct influence on animal growth performance as it directly influences the amount of body protein deposition.

Granulated Lysine (LYSINEX) has many benefits over the conventional L- Lysine used. It reduces wastage during transferring from bags or during feeding mash feed, has better palatability and also easy to handle. With a mesh size of 12 micron, it is an ideal product for all kinds of feed.

Composition:

- L- Lysine monohydrochloride 98.5% w/w granules (12 µ mesh size)
- Carrier aa

Recommended usage:

0.1- 0.3% of feed for all species

Packing:

25kg bags
